(54) OPTICAL REFLECTION FILM AND BACKLIGHT DEVICE FOR IMAGE DISPLAY USING THE SAME

(57) Abstract:

PROBLEM TO BE SOLVED: To provide an optical reflection film which can keep image quality high over a long time without causing any abnormal light emission due to that a light transmission plate get scratched.

SOLUTION: The optical reflection film has a light reflecting surface at least its one surface, has ≤ 10 glossiness of the light reflecting surface, has a skin layer on the light reflecting surface and contains particles with ≤ 0.1 wt.% inorganic particle concentration in the skin layer.

LEGAL STATUS

[Date of request for examination]

05.03.2004

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
